Weight [kg]: 820 kg

Four-post lift PK4-3500.

It is a hydraulic powered lift with manual release of the safety locks in the columns.

The platforms are synchronized by means of steel ropes.

The lift will be used in every car workshop for servicing passenger cars, off-road

SUV and light commercial vehicles. It is perfect for repair or diagnostic work.

This lift is also useful as a parking lift for storing two vehicles on one parking space.

Thanks to the additional special drip plate between the platforms, no oil, no fuel

whether any other contamination falls on the vehicle parked below.
